

The PMI Advanced
Humidity Controlled Oven

Not just products...solutions!

DESCRIPTION

The PMI Humidity Controlled Oven(HCO) has been designed to provide an accurate temperature and humidity controlled chamber with a simple user interface for convenience. The HCO is composed of an electronic temperature regulator, an air bath, a humidity probe to control the humidity level, a water vapor injection system, and a timer. It is ideal for keeping various types of samples in a humidity and temperature controlled environment for either a user specified set amount of time, or continuously.
